EDUCATION

2013-2017
**BACHELOR OF TECHNOLOGY,
COMPUTER SCIENCE**
Mallabhum Institute of Technology

2011-2013
HIGH SCHOOL
D.A.V Public School

2000-2011
SCHOOL
De Nobili School

CERTIFICATES

[AI for everyone, Deeplearning.ai](#)
[Protocol Buffers, Udemy](#)
[Data Structures & Algorithms, Udemy](#)
[System Design, Udemy](#)

SUMMARY

- Senior Software Engineer with 8+ years of experience in Python development, DevOps infrastructure, and end-to-end automation engineering.
- Proven expertise in system design, distributed microservices, ETL pipelines, and integration platforms on GCP and Kubernetes.
- Extensive background in scalable big data platforms, including ArangoDB knowledge graphs and ELK/Kafka clusters processing 7B+ records daily.
- Experienced in LLM/RAG architectures using FastAPI, LangChain, LanceDB, and PostgreSQL. Strong advocate for clean code, CI/CD, and engineering mentorship.

EXPERIENCE

 **H&M**

Mar 2024-Present

SOFTWARE ENGINEER II

- Developing an **Integration platform** to handle complex business objects across **PLM software, ERPs**, and in-house applications, making them available in a standardized format for 10+ downstream systems via configurable **no-code workflows**.

 **Jio Platforms Private Limited**

Sep 2021- Mar 2024

SOFTWARE ENGINEER II

- Engineered a **Knowledge-graph platform** with **micro-services** (Schema, Data, Search) for semantic storage and retrieval of domain knowledge, enhancing data accessibility.
- Led **performance monitoring and scaling** of Knowledge Graph Services, ensuring optimal scalability for **Big Data ingestion** and retrieval.
- Mentored the AICOE AI Platform team on best practices, code quality, and maintainability.

 **Ajio**

Sep 2019 - Sep 2021

DEVOPS ENGINEER

- Deployed robust clusters for **log aggregation** processing **7B+ records daily** and conducted comprehensive load testing for in-house cloud platform JAWS.
- Optimized scalability of **ELK and Kafka clusters** across Jio business units, ensuring seamless data flow and **reduced system latency**.
- Founded the **Tools & Automation team** at Ajio, streamlining workflows and eliminating redundant tasks across multiple departments.

 **Deepcompute LLC**

Aug 2017 - Sep 2019

ASSOCIATE SOFTWARE ENGINEER

- Developed and enhanced **open-source libraries** ([logagg](#), [basescript](#), [deeputil](#)), contributing to versatile and **reusable software components**.
- Managed **deployments and logs**, establishing and enforcing **code quality** benchmarks for robust and efficient software delivery.

SKILLS

CONCEPTS

System Design • Microservices • LLM Frameworks (RAG, LangChain) • NLP • Protocol Buffers (gRPC) • REST APIs (FastAPI) • CI/CD • Knowledge Modeling • OOP • Dashboarding

LANGUAGES

Python • Bash

DATABASES

PostgreSQL • LanceDB • ArangoDB • Elasticsearch • MongoDB • InfluxDB • Redis

DEVOPS & TOOLS

Linux • Docker • Kubernetes • Azure DevOps • GCP • Ansible • Elastic Stack (ELK) • Prometheus • Travis CI • Kibana • Grafana
